IDENTIFIERS	*UNESCO

ABSTRACT

This directory provides information on UNEVOC (International Project on Technical and Vocational Education) Centers and related organizations and institutions. The UNEVOC Centers were organized for the following purposes: develop and lead a national network; ensure the sharing of expertise and a flow of information; provide research; and contribute to UNESCO (United Nations Educational, Scientific, and Cultural Organization) publications and databases. The directory lists 184 centers located throughout Europe; Asia, the Middle East, Africa, and the Pacific Islands. Each listing includes an address, contact names, description of programs and facilities, and publications. The directory also provides addresses of UNESCO offices and addresses of the institutions involved in vocational education and training. The directory is printed in English and French. (KC)

Document Nr. ED/IUG/001 • Version of 22 June 1999

Preface

The world of work has changed dramatically over the past decade. For some people it has become technologically complex, demanding highly sophisticated work skills. For others, as a result of unemployment, it has denied them the satisfaction that comes from the challenge of work, and the sense of achievement gained therefrom. As a result, the world of work is increasingly requiring continuing education and training.

UNESCO has recognised this reality in a number of different ways. One of these has been to expand and develop its role in the area of technical and vocational education. A part of this expansion has been to support a network of institutions that are significantly related to technical and vocational education and to the world of work.

To develop and support this network, UNESCO established, under its Education Programme, the UNEVOC Project. It invited its Member States to nominate relevant national institutions to become UNEVOC Centres. These Centres are expected to assume the responsibility of giving leadership and thrust to the education and development of skills relating to the world of work.

This Directory provides information on UNEVOC Centres and related organisations and institutions. It has been compiled by the UNEVOC Implementation Unit in Berlin with a view to strengthening the UNEVOC network and encouraging interrelationship and effective communication among the members of the network.

I commend it to you. I would encourage you to support the effectiveness and efficiency of this Directory by ensuring that its information is up to date and relevant. Please do not hesitate to contact UNESCO-UNEVOC Berlin for any question and further information.

Préface

Le monde du travail a connu au cours de la dernière décennie d'énormes changements. Il est devenu pour certains technologiquement complexe, exigeant des compétences professionnelles ultra-sophistiquées. Quant à d'autres, frappés par le chômage, il leur a refusé la satisfaction de relever le défi du travail et l'épanouissement qu'il procure. Ainsi, l'enseignement et la formation continus constituent de plus en plus des impératifs pour le monde du travail.

Cette réalité, l'UNESCO en tient compte de bien des manières, parmi lesquelles l'extension et le développement de son rôle dans le domaine de l'enseignement technique et professionnel. Un élément de cette extension a consisté à soutenir un réseau des institutions significativement liées à l'enseignement technique et professionnel et au monde du travail.

Pour développer et soutenir ce réseau, l'UNESCO a mis en place au sein de son programme de l'éducation le projet UNEVOC, invitant ses États membres à désigner des institutions nationales appropriées qui, en tant que Centres UNEVOC, seront appelées à assumer la responsabilité de guider et d'impulser l'enseignement et le développement de compétences liées au monde du travail.

Ce Répertoire rassemble des informations sur ces Centres UNEVOC et d'autres organisations et institutions. Il a été élaboré par l'unité de mise en oeuvre du projet UNEVOC à Berlin pour renforcer le réseau UNEVOC et favoriser les contacts directs et la communication efficace entre les membres du réseau.

Je vous le recommande. Je vous encourage à soutenir l'efficacité et l'impact de ce Répertoire en veillant à l'actualité et à la pertinence des informations qu'il contient. N'hésitez pas à contacter UNESCO-UNEVOC Berlin si vous avez des questions ou vous désirez plus d'information.

Introduction

The International Project on Technical and Vocational Education (UNEVOC) is a project of the United Nations Educational, Scientific and Cultural Organization (UNESCO) for the development and improvement of technical and vocational education in Member States. Following a resolution of UNESCO's General Conference in 1991, the UNEVOC Project was launched in 1992.

UNEVOC works in *three programme areas:*

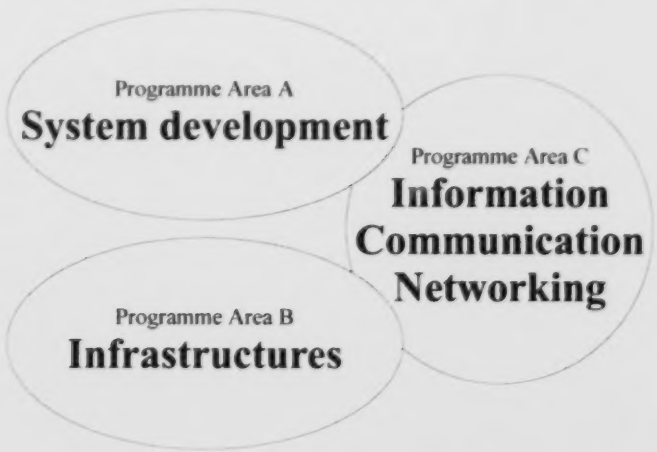
- *Programme Area A* deals with the international exchange of experience and the promotion of studies on policy issues. It is devoted to *system development* in technical and vocational education.
- *Programme Area B* is devoted to strengthening national research and development capabilities, that is to the development of *infrastructures*.
- *Programme Area C* concerns access to data bases and documentation in its broadest sense, in other words, with *information, communication* and *networking*.

Introduction

Le Projet international pour l'enseignement technique et professionnel (UNEVOC) est un projet de l'Organisation des Nations Unies pour l'éducation, la science et la culture (UNESCO) visant au développement et à l'amélioration de l'enseignement technique et professionnel dans les États membres. Le projet UNEVOC a été lancé en 1992 à la suite d'une résolution de la Conférence générale de 1991 de l'UNESCO.

L'UNEVOC opère dans *trois champs de programme*:

- *Le champ de programme A* a pour objet l'échange international d'expérience et la promotion d'études sur des questions de politique générale. Il est consacré au *développement des systèmes* d'enseignement technique et professionnel.
- *Le champ de programme B* est consacré au renforcement des capacités nationales de recherche et développement, c'est-à-dire au développement des *infrastructures*.
- *Le champ de programme C* porte sur l'accès aux bases de données et à la documentation au sens le plus large du terme, c'est-à-dire sur *l'information*, la *communication* et le *réseau agissant*.



One of the major activities of UNEVOC is the establishment of an international network of leading national and regional institutions active in the planning, research and development of technical and vocational education.

L'une des principales activités de l'UNEVOC est la mise en place d'un réseau international d'institutions nationales et régionales de pointe intervenant dans la planification, la recherche et le développement de l'enseignement technique et professionnel.

Member States of UNESCO were invited, through their National Commissions for UNESCO, to nominate a **UNEVOC Centre** to act as a focal point for the UNEVOC international network. Where appropriate, the National Commission for UNESCO can appoint up to three **UNEVOC Associate Centres**.

The responsibilities of the UNEVOC Centres include:

- developing and leading a national network;
- ensuring information flow to and from UNESCO and other UNEVOC Centres;
- ensuring that expertise is shared among UNEVOC Network members;
- providing research as requested by the UNESCO Secretariat;
- contributing to UNESCO publications and data bases;
- updating the data of the UNEVOC Directory.

This present version (17 February 1999) of the UNEVOC Directory includes data of 192 national institutions, among them 130 UNEVOC Centres and 62 UNEVOC Associate Centres, from 128 Member States of UNESCO. In addition, data of 3 international and 8 regional institutions have been included. Since these data are subject to frequent change, this Directory will be constantly updated.

UNESCO-UNEVOC Berlin would appreciate receiving your comments, suggestions or any amendments to this present version, which will be taken into consideration in future editions.

Les États membres de l'UNESCO ont été invités, par leurs Commissions nationales pour l'UNESCO, à désigner un **Centre UNEVOC** devant servir de point focal pour le réseau international UNEVOC. En cas de besoin, la Commission nationale pour l'UNESCO peut désigner jusqu'à trois **Centres UNEVOC associés**.

Les Centres UNEVOC assument notamment les missions suivantes:

- développer et gérer un réseau national;
- assurer le flux d'information en direction et en provenance de l'UNESCO et des autres Centres UNEVOC;
- assurer la diffusion des informations parmi les membres du réseau UNEVOC;
- assurer les recherches demandées par le Secrétariat de l'UNESCO;
- contribuer aux publications et bases de données de l'UNESCO;
- actualiser les données du Répertoire UNEVOC.

La présente version (17 février 1999) du Répertoire UNEVOC contient les données de 192 institutions nationales, dont 130 Centres UNEOC et 62 Centres UNEVOC associés, de 128 États membres de l'UNESCO. Les données de 3 institutions internationales et 8 institutions régionales y figurent également. Ces données étant soumises à de fréquentes modifications, le Répertoire fera l'objet d'une remise à jour permanente.

UNESCO-UNEVOC Berlin se réjouira de recevoir tous commentaires, suggestions et corrections que vous voudrez bien lui soumettre sur la présente version, et en tiendra compte pour la prochaine édition.

i Georgian National Observatory has been established with the support of ETF and the consortium. The key objective is to help the unemployed individuals to be trained or retrained, in order to find suitable jobs; prepare the draft laws and legislative bases for the authority in the field of VET and employment. GNO works out and publishes "Stocktaking Report". • In the report the latest data on VET, labour market and other socio-economic situation of the country are available. It is disseminated not only throughout the network of National Observatories. The data are used by some national and international organisations, working in these fields. The recommendations and comments of GNO have been taken into account and have been included in the laws, and other legislative acts, approved by the Parliament.

i The BIBB carries out research and development activities in the field of vocational training. It provides services and counsel for the Federal Government and all parties engaged in the political, scientifical and practical side of vocational training. • It does national and international research and development. Its main aim is to develop principles to govern initial and continuing training for skilled workers, skilled employees, journeymen and master craftsmen in the majority of economic sectors and also to modernise and improve training provision to keep abreast of technical, economic and social change. • One important element in this respect is close co-operation with practitioners: Experts from all sectors of the economy work together with the Institute's professionals to develop training ordinances and innovative learning concepts which allow for up-to-date and forward-looking vocational training

i Our technical School has got a training workshop. The number of students: 850. They are trained in a 4+1- year system (classes 9-12 + 13). At the end of the 12th year all the students take a final examination (GCSE). • There is vocational training before or after GCSE in the following fields: car-mechanic, vehicle technician, traffic technician (highway and railway), locomotive-mechanic, post-office clerk. • The system of vocational training is going to be changed. Before GCSE the emphasis will be on general education so the vocational training after the final examination will take 1,5-3 years. • The professions trained in our school help the people to avoid unemployment and to develop our region.

i The institution is a technical school for woodworking. Students of the ages 14 and 19 are studying at our grammar school. Besides specialised qualification it provides a comprehensive one too; So our students can go on with their studies at universities. • Fields of vocational training are technology of raw material, cabinet-making and carpentry. Specialised training is provided from manufacturing to applying machines with computer technique in woodworking. People with GCSE obtained at other institutions can have an in-service training at our school. • We have 600 students. Our school is in constant contact with the National Association of Woodworkers and Joiners. • Our co-operation is at the next subjects: • Introducing and establishing the technology of working surface friendly to environment. • Organising in-service training for students and teachers, obtaining an international certificate at the subject of applying NC and CNC technology in woodworking that is based on KOLPING metallurgy training programme.

i National Observatory of Kazakhstan is an organisation designated to gather and analyse information on vocational education and training. It provides knowledge and expertise in this field to the government (mainly to ministries of education, culture and health and labour and social protection) and key players. • It was established in 1996 on the basis of non-governmental organisation named "Eurasian Centre for Development of Education" whose mission is to promote and support education reforms in Kazakhstan in the transition period. • At present the National Observatory is hosted by the Republican Institute for improvement of qualification of leading and research-pedagogical staff of education system. • The Steering Committee of the National Observatory brings together all interested partner organisations and creates a forum for stakeholders from different ministries and institutions involved in education and training, including social partners.

i The ITTHO is one of Malaysian higher learning Institutes. The primary aim of the institute is to fulfil the needs for academic lecturers and teaching instructors of the polytechnics in Malaysia. • The institute conducts diploma, bachelor and post-graduate level courses in civil, mechanical and electrical engineering with specialisation in 34 different areas. The post-graduate courses are in the engineering disciplines and in technical and vocational education. The majority of post-graduate students are in the Masters of Education course which was developed with the aim of ensuring the ITTHO's graduates are not only knowledgeable and skilful in their engineering disciplines but also in pedagogy and teaching skills.

i The VTA has been endorsed by the Omani government to do implementation planning and delivery of vocational training and technical education programmes. The VTA currently runs 4 Vocational Training Centres and 5 Technical Colleges. The Centres deliver vocational programmes on the semi-skilled and skilled levels. The Colleges target the highly-skilled technician level, running post-secondary programmes only.

i The College is a state institution of higher learning for scientific and technological education. Through a comprehensive and relevant scientific and technological education, the College aims to provide industries, schools and other institutions in the region with skilled workers, technicians and professionals who will lead in industrial development. • The College offers advanced education to teachers of industrial and technical education. It provides courses to students who are preparing themselves to become teachers in the field of vocational, technical and industrial education as well as in general education. It is likewise an institution for training future technicians and skilled workers.

i St. Martin Rural Training Centre provides training in Agriculture, Carpentry, Poultry, Piggery, Simple Book Keeping, Arts and Crafts and other fields geared to rural livelihood. It is a residential centre that trains young men who are unable to continue with formal education because there are not enough places in the country's schools. The centre provides skills that will enable the young men to return to their villages and become self-sufficient. Currently the centre is building new facilities to enable it to provide training to young women and young couples. The proposed training will include residential training along with extension work when thre trainees return to their villages.

i The Section for Research and Development of Education is a separate organisational unit within the Ministry of Education which work on educational research, the development of the system of education as well as on information and documentation for this area. Besides conducting research in general issues concerning the conception, planning and development of the system of education, other issues such as structural changes in the world of work, other countries' experience, international standards, are being analyzed. • The section's information and documentation service has a long tradition and it is engaged in all usual information and documentation activities (collecting, processing and keeping documents, publications and books). The section itself publishes a number of periodicals and books on education in the world and in Yugoslavia. Vocational training is one of section's main fields of work.

Addresses at UNESCO

The UNEVOC Project is implemented under the responsibility of **UNESCO's Education Sector**, Section for Technical and Vocational Education. An **International Advisory Committee** has been established by the Director-General to guide the Organization in the preparation and implementation of the UNEVOC Project. The **UNEVOC Implementation Unit in Berlin**, Germany, plays an important role in the implementation of the Project. Many UNEVOC activities are executed at the regional level by UNESCO's **Regional Offices** in **Africa**, the **Arab States, Asia and the Pacific,** and **Latin America and the Caribbean**.

UNESCO Offices and National Commissions for UNESCO are involved in selected UNEVOC activities as well.

Detailed information on the assignment of States to UNESCO Regions is given in the table "Definition of Regions" on page 77 ff.

For addresses at UNESCO, please refer to the data on the following pages.

Adresses à l'UNESCO

Le Projet UNEVOC est réalisé sous la responsabilité du **Secteur de l'éducation de l'UNESCO**, Section de l'enseignement technique et professionnel. Un **Comité consultatif international** a été instauré par le Directeur général pour guider l'Organisation dans la préparation et la réalisation du Projet UNEVOC. **L'unité de mise en oeuvre du projet UNEVOC à Berlin**, Allemagne, joue un rôle important dans la réalisation du Projet. De nombreuses activités de l'UNEVOC sont réalisées au niveau régional par les **Bureaux régionaux** de l'UNESCO en **Afrique**, dans les **États arabes**, en **Asie et Pacifique**, en **Amérique latine et Caraïbes**.

Les Bureaux de l'UNESCO et les Commissions nationales pour l'UNESCO participent également à des activités sélectionnées de l'UNEVOC.

Des informations détaillées sur l'appartenance des États aux Régions de l'UNESCO figurent au tableau "Définition des régions" à partir de la page 77.

Pour les adresses à l'UNESCO, prière de consulter les informations figurant aux pages suivantes.

i The IAEVG is a voluntary international organisation representing a wide range of individuals and national associations concerned with educational and vocational guidance. Its aim is to promote communication between persons and organisations active in educational and vocational guidance. It does not, itself, deal directly in training in the sense of offering courses but it assists and participates in seminars and conferences organised by national associations. It has also completed a number of research contracts for UNESCO and other organisations.

i SEAMEO VOCTECH is a centre dedicated to excellence in vocational and technical education and training (VTET). Our activities include training programmes in VTET as well as research and development in the area. We also embark on information services that include publications, print and non-print as well as relevant special projects, commissioned by requesting agencies and organisations. • Annually, we conduct about 7 regular programmes in VTET. The thrust or the programmes is in management and teacher training. Besides the regular programmes, we also conduct numerous seminars, conferences, workshops, and learning sessions. • Our participants are mostly from SEAMEO Member Countries, although, in our effort to go global, we have been reaching out to a wider clientele, some from beyond Southeast Asia.

Definition of Regions

In accordance with decisions taken by the General Conference of UNESCO, regions have been defined with a view to the execution by the Organization of regional activities. The States belonging to a region are empowered to participate in regional activities in which the representative character of States is an important factor.

The table on pages 79 ff. indicates the assignment of States to regions. Please note that some States belong to more than one region.

Définition des régions

Conformément aux résolutions adoptées par la Conférence générale de l'UNESCO, les États membres et membres associés ci-après sont fondés à participer aux activités régionales pour lesquelles le caractère représentatif des États constitue un élément important.

Le tableau des pages 79 et suivantes indique l'appartenance des États aux régions. On notera que certains États font partie de plusieurs régions.
